

MediFlex PCLP

POUCHES

Film-Only for optimum protection

MediFlex PCLP pouches consist entirely of film that can be quickly and easily peeled open to enable the removal of sterile contents. In this way, they offer the best all-round protection for your medical devices.

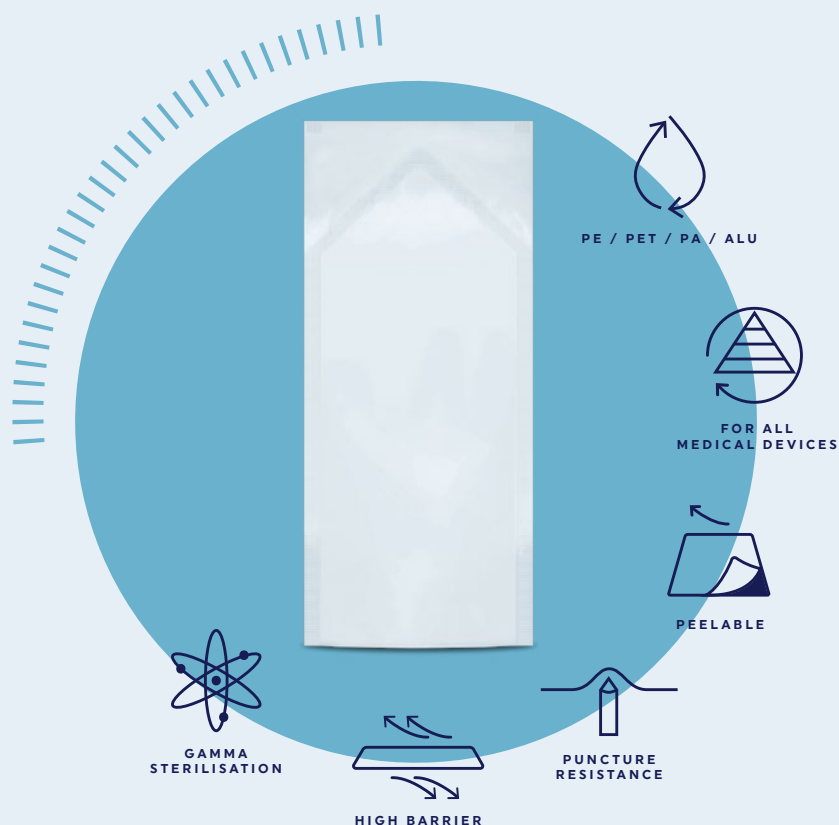

PROPERTIES

- Total bacterial impermeability enables long-term storage of sterile products
- Highly transparent, coloured or as multi-layer laminate with aluminium foil
- Sterile and user-friendly extraction through soft, fibre free peel allowing ease of opening
- Sterile products are hermetically sealed, with vacuum packaging possible
- Easy identification of contents

MediFlex PCLP pouches comply with the standards DIN 58953, DIN EN 868 and DIN EN ISO 11607.

WE PROTECT WHAT MATTERS MOST

SUITABLE FOR STERILISATION BY

- Irradiation

RANGE

MediFlex PCLP SEE-THROUGH PACKAGING
