

MediFlex PMP

SEE-THROUGH PACKAGING

Economical and reliable

MediFlex PMP see-through pouches and tubes are both clear and safe, exceeding the requirements of the applicable standards. Visual defect checks and indicators for the relevant methods of sterilisation provide additional safety.

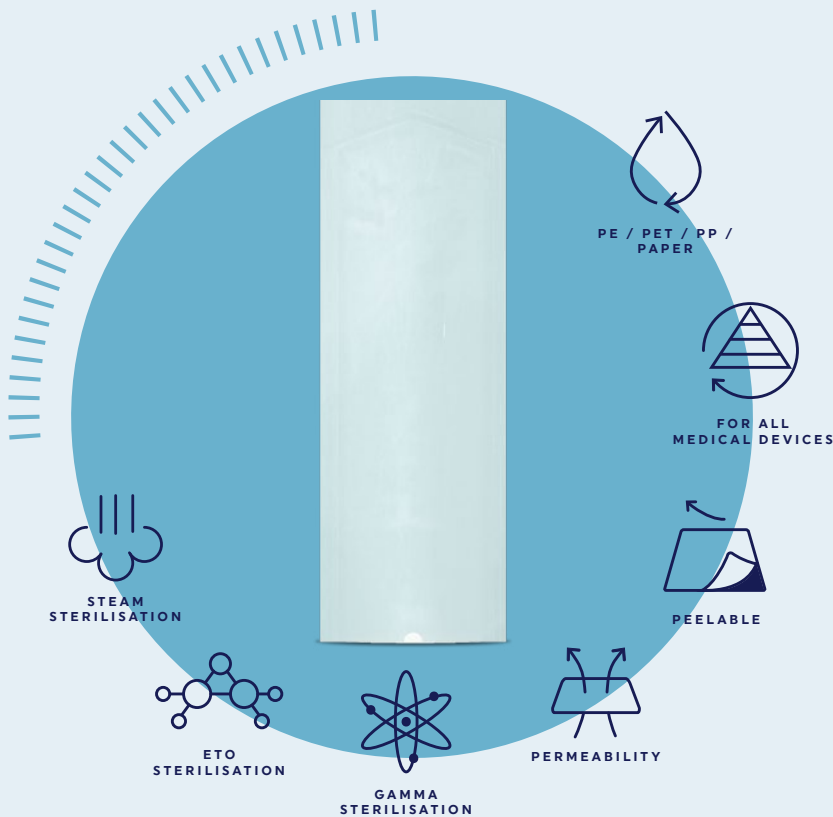

PROPERTIES

- Tinted film makes it easier to detect visual defects in the seals
- Print is completely visible through the film
- Easy, clean peel effect.
- Colour indicators for steam, ethylene oxide or formalin sterilisation outside the fill area (**MediFlex PMP D**), with no risk of migration onto contents; eliminates time-consuming application of labels

MediFlex PMP pouches comply with the standards DIN 58953, DIN EN 868 and DIN EN ISO 11607.

WE PROTECT WHAT MATTERS MOST

RANGE

MediFlex PMP SEE-THROUGH POUCHES

- Ideal for large series, e.g. in central sterilisation and industry
- For light products without sharp edges
