## SUSTAINABLE PACKAGING SOLUTIONS FOR MEDICAL PRODUCTS

# MediFlex PFP

## MONO PE POUCH SOLUTION WITH UNCOATED TYVEK®

A combination of Tyvek® and laminated film makes our FLEXOPEEL® packaging very robust and – in comparison to paper – it is also not sensitive to moisture: it remains absolutely impermeable to bacteria. High strength, excellent gas/air permeability and a user-friendly peel system are further FLEXOPEEL® advantages.

### SUSTAINABLE PACKAGING SOLUTIONS

- Sterile and user-friendly extraction by peeling open the packaging
- High puncture resistance
- Fast identification of the contents

# MediFlex FPT

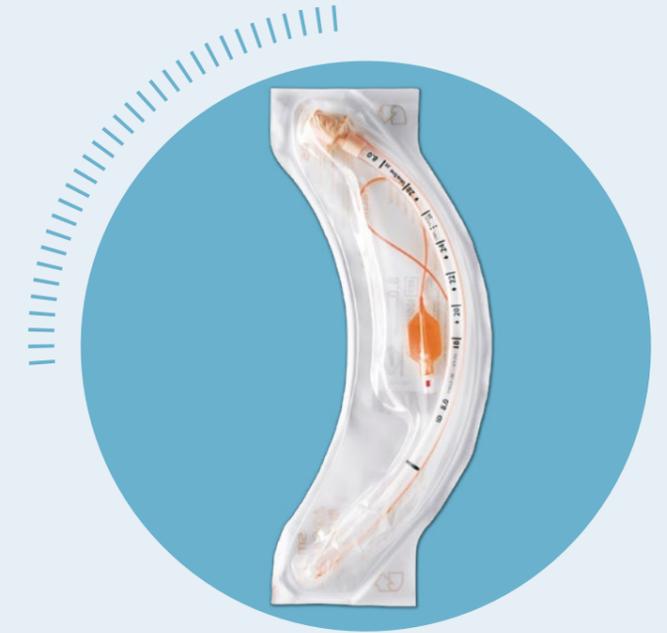

## PEELABLE MONO PE FOR FFS WITH UNCOATED TYVEK®

The perfect solution for sustainable form-fill-seal applications in combination with uncoated Tyvek®. The packaging offers many advantages in terms of end-of-life waste management.

### SUSTAINABLE PACKAGING SOLUTIONS

- Low back shrink property and good forming characteristics
- Ideal for most draw applications, excellent toughness.
- Good seal strength and clean peel from uncoated Tyvek®
- Easy to recycle and a very sustainable solution compared to standard packaging

# MediFlex PCLP

## PURE FILM FOR OPTIMUM PROTECTION

MediFlex PCLP pouches made completely from transparent film make it easy to extract the contents in a sterile condition by simply peeling open the film. They offer all-round optimum protection for your medical devices.

### SUSTAINABLE PACKAGING SOLUTIONS

Substitute the traditional PA/PE structure with the new generation of O-PE/PE films

# MediFlex FPP

## PEELABLE MONOFILM FOR FFS WITH UNCOATED MEDICAL PAPER

Our recycle-friendly, flexible co-extruded films are great for thermoforming and offer an excellent puncture resistance. Depending on usage, they are available on a polyethylene (PE) or polyolefin (PO) base. With a suitable lidding film, our thermoformable PA-free bottom films are a sustainable solution and great protection for your product.

### SUSTAINABLE PACKAGING SOLUTIONS

- PA-free, soft, recycling-friendly
- Excellent puncture resistance
- Fibre-free clean peel with uncoated medical papers or coated porous webs
